

**Gets a
Job!**

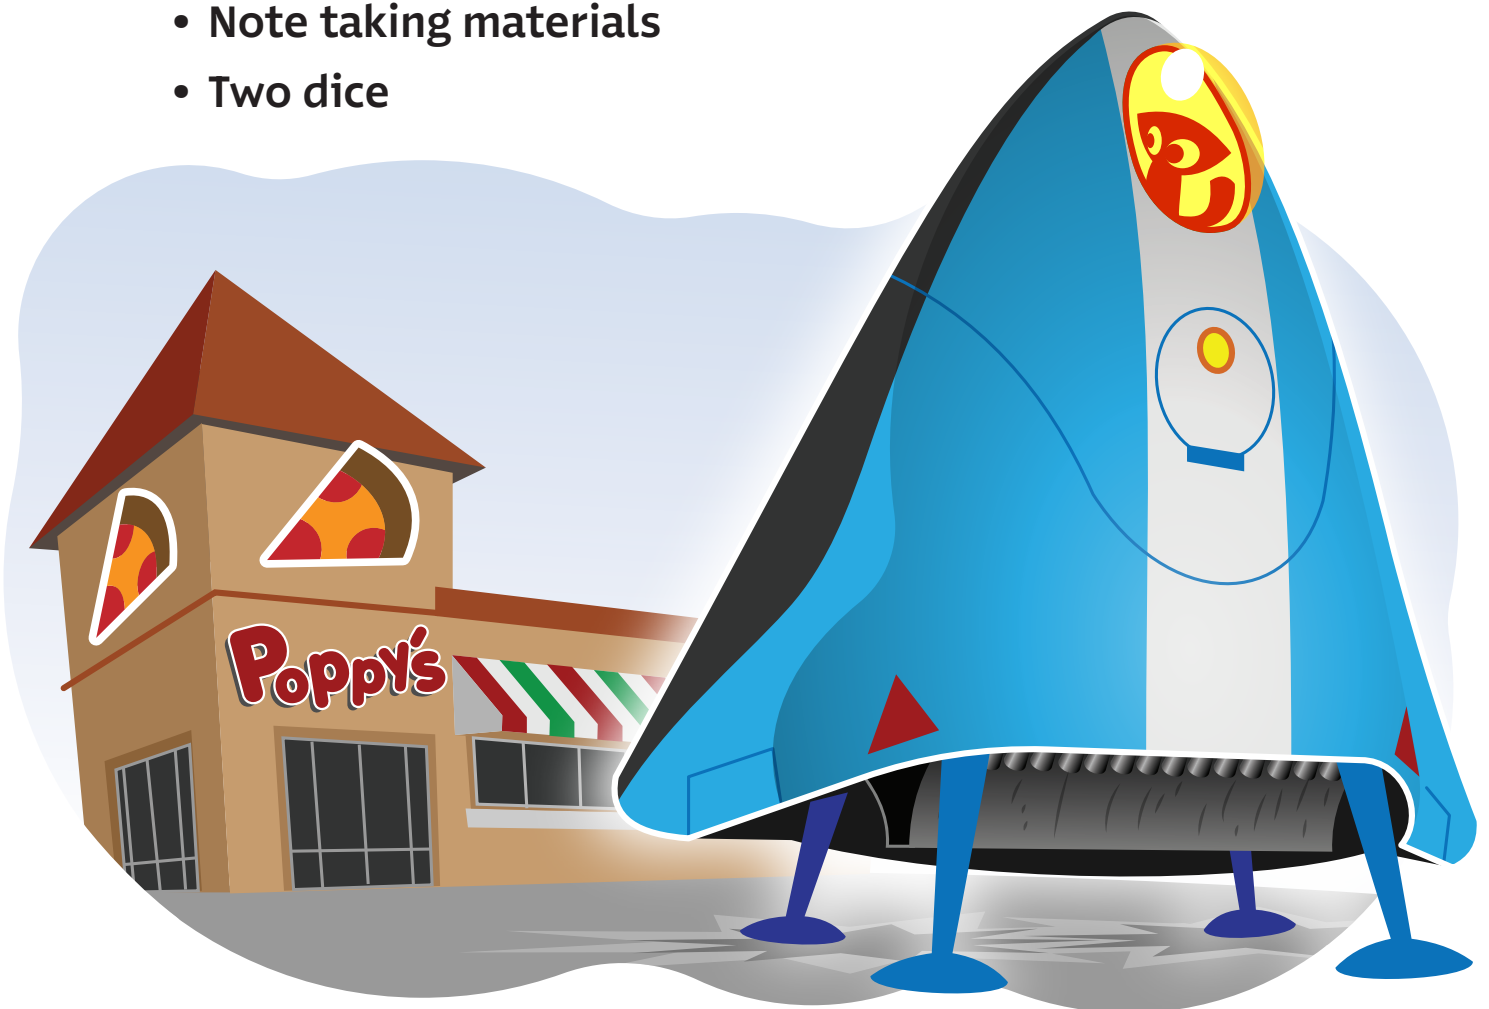

CJ Gets a Job!

CJ wants to know about how business is done on Earth and decides to get a job at a pizzeria. You are helping CJ on the first day of work by helping CJ learn not only what goes on a pizza, but figuring out how much they cost.

Materials:

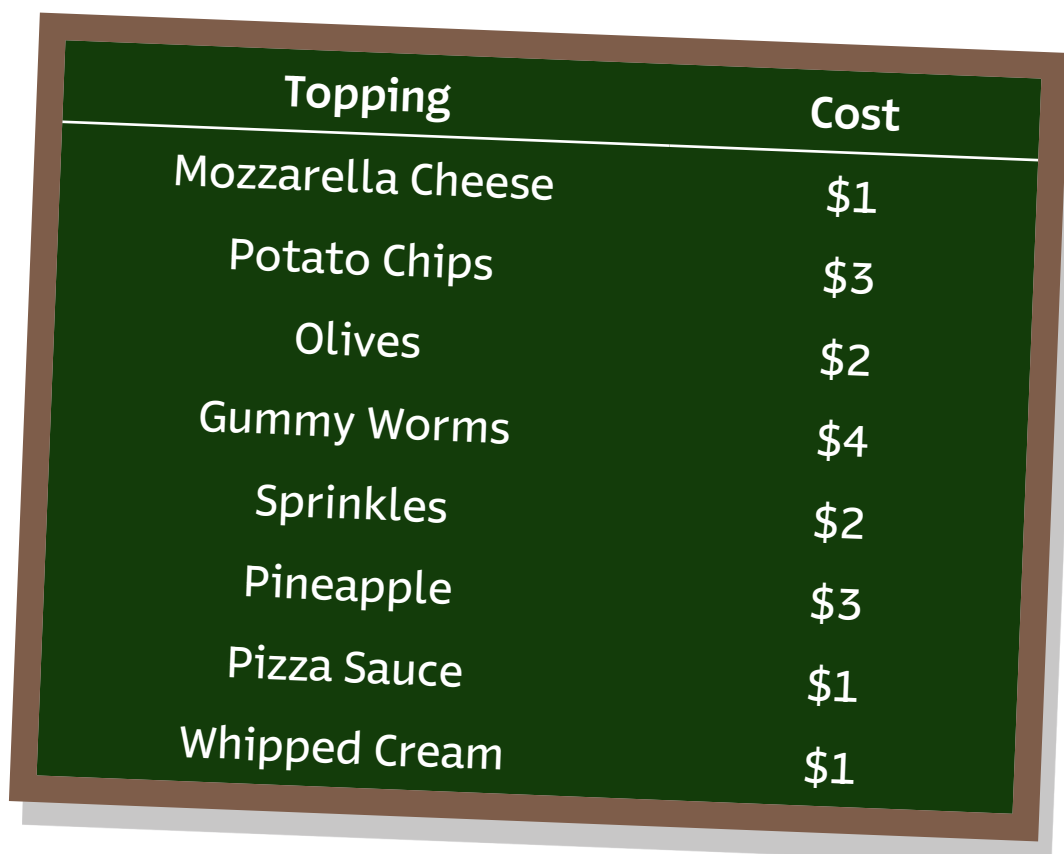

- Computer with Code Jumper App
- Code Jumper kit
 - Hub
 - 8 Play pods
- Note taking materials
- Two dice

Directions:

Create your menu:

There are eight different toppings you can use to create pizzas, some you have tried before, and some you have not. Follow the directions below to create your menu:

Topping	Cost
Mozzarella Cheese	\$1
Potato Chips	\$3
Olives	\$2
Gummy Worms	\$4
Sprinkles	\$2
Pineapple	\$3
Pizza Sauce	\$1
Whipped Cream	\$1

- Select the Sound set: Pizza for Thread 1 of the Code Jumper app.
- To add a topping to your pizza, add one Play pod to the Hub and turn the Sound dial to the sound that represents the topping you want to add. To add another topping, add another Play pod to your program and turn the dial to create the topping combinations you think your customers will like. Give your pizza a name in your menu.

Tip: Think of the Hub as your pizza crust!

- Determine the price of your pizza by adding up the cost of all your toppings.
- Add the price to your menu.

Tip: You can have 4 or 5 different pizzas on your menu.

Pizza Menu		
Name	Toppings	Cost

**Write your
menu here!**

Ordering a pizza:

After all that work creating the menu you and CJ are so hungry for pizza. Even when you work at the pizzeria, you still must pay for any pizza you order and to buy a pizza you must have money.

To determine how much money you have, roll both dice and add the number on each die, this is how much money you have. The minimum amount is \$2 and the maximum is \$12. Now you can figure out which pizza you have enough money to order. To order your pizza, build it in Code Jumper!

Partner extension:

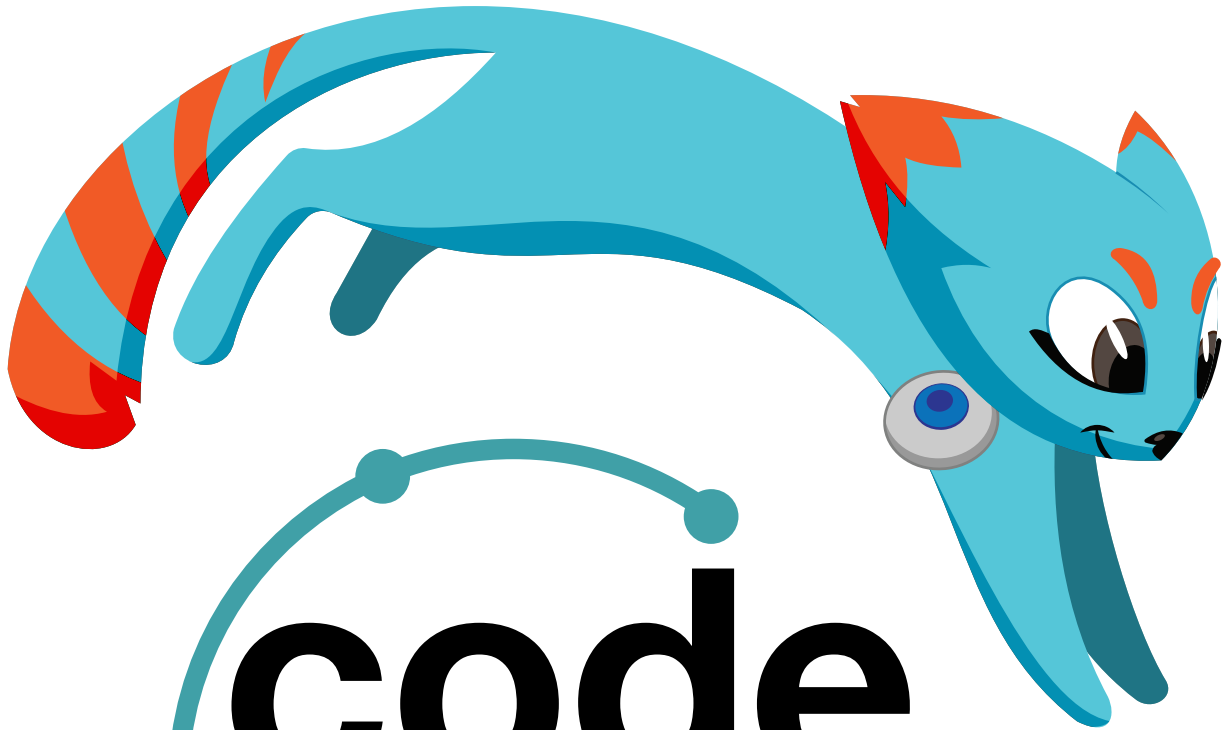

Give your menu to someone and ask them to choose a pizza and make it for them in Code Jumper. Have your customer “eat” their pizza by running the program.

- Does hearing the sound of the toppings make you want to eat your pizza more, or less?
- Did you have enough money to buy more than one pizza?

Congratulations! You’ve completed another CJ adventure.
